FAPM: Your First Activity, Start to Finish

End-to-end practice and testing guide, ICT, revised 25 October 2026

RESTRICTED

This guide follows the ICT department through one financial year in FAPM, from start to finish. The System Administrator loads the staff list and appoints the Head of ICT. The Head of ICT prepares the department's workplan and budget from the template, and the CEO reviews it, returns it once and approves it. The Head then prepares an activity memo charged to the approved budget. The Office of the CEO reviews it and the CEO approves it and instructs Finance and Procurement. The team goes to the field, the Head reports what was spent, and the Office of the CEO accepts the report and closes the activity. Last, the CEO adjusts the budget mid-year. It takes about two hours. Do the parts in order; each one ends with a **Check** of what you should see.

> **Use the test system, never the live one.** Nothing submitted in FAPM can be deleted, so practice records on the live system would stay for good. On the test system, ask the trainer to turn **SMS when action is needed** off in Reference data › Thresholds (or leave the SMS Leopard keys empty), and to send email to a test mailbox. Then no real person is messaged.

Who takes part

If one person practises alone, sign in as each role in turn when a part says so. Sign out first each time (your name, top right, then **Sign out**).

Role	Account	What they do
System Administrator	From the trainer	Loads the staff list, appoints the Head of ICT, checks settings and the logs.
Head of ICT	Made in Part 2 for Samuel Kiprono	Prepares the workplan and budget, the memo and its team, and the activity report.
Chief Executive Officer	From the trainer	Reviews and approves the workplan, approves the memo, instructs Finance and Procurement, adjusts the budget.
Assistant Chief of Staff	From the trainer	Reviews the memo, returns it once, forwards it, records attendance.
Chief of Staff	From the trainer	Confirms the activity started, returns and accepts the report, closes the activity.
Heads of Financial Services - Accounts and Supply Chain	From the trainer	Act on the CEO's instructions to process the imprest and procure the tickets.
Mary Njeri, ICT Officer	No account: a link	Optional Part 18: prepares a second memo through the Head's memo request.

For the trainer: create the CEO, Chief of Staff, Assistant and System Administrator accounts with `php artisan activities:create-user ceo email "Name"` (likewise `chief_of_staff`, `assistant_chief_of_staff`, `admin`), and the two Heads with `php artisan activities:create-user hod email "Name" --department="Financial Services - Accounts"` and `--department="Supply Chain"`. Do not create the Head of ICT: Part 2 appoints them.

The files you need

All are in `docs/guides`. Everyone and every figure in them is made up for practice.

File	What it is
FAPM-Practice-Staff-List.xlsx	Nine officers: Peter Otieno, Amina Hassan, Faith Wanjiku (casual), Brian Kiptoo (attachee), Mary Njeri and Samuel Kiprono in ICT, and one officer each in Administration, Finance and Supply Chain.
FAPM-Practice-Workplan-ICT-FY2026-27.xlsx	The practice workplan: four ICT activities in the workplan template, KES 6,570,000.00. The last line has no deliverables on purpose.
FAPM-Workplan-ICT-Example-FY2026-27.xlsx	A fuller ICT example (ten activities, KES 27,462,000.00), to show what a complete workplan looks like.

Any small PDF	Used as the activity report document.

The workplan lines

Code · activity	Qty × unit cost	Quarters	Proposed	Approved
2211300 · Network support visits to constituency offices	24 × 35,000	Q1 to Q4	840,000.00	840,000.00
3111002 · Replace end-of-life laptops	40 × 95,000	Q2	3,800,000.00	1,900,000.00
2210799 · Cyber security awareness training	6 × 180,000	Q2, Q3	1,080,000.00	1,080,000.00
2211306 · ICT policy and standards review	Amount only	Q3	850,000.00	850,000.00
Total			**6,570,000.00**	**4,670,000.00**

The practice memo

Field	What to type or choose
Title	Network support visits, Kisumu Central
Category, Activity type	Monitoring & Evaluation, Monitoring visit (or any category your test system lists)
Purpose	Restore and check connectivity at the Kisumu Central constituency office
Introduction and justification	The office has been offline since October; the workplan schedules network visits this quarter.
Key risks	Spare parts may not be available locally.
Memo reference, Date issued	NG-CDF BOARD/ICT/004/2026, today (both required)
Planned start, days	Today, 3 (4 payable nights: the departure night before the start and 3 activity nights)
County, constituency, venue	Kisumu, Kisumu Central, NG-CDF Kisumu Central office
Budget line	2211300 · Network support visits to constituency offices
Estimated budget	137200

Cost line	How it is worked out	KES
DSA, Peter Otieno (scale 6), team lead	4 nights × 11,200	44,800.00
DSA, Amina Hassan (scale 9)	4 nights × 6,300	25,200.00
DSA, Faith Wanjiku (casual, scale 10)	4 nights × 6,300	25,200.00
DSA, Brian Kiptoo (attachee, INTERN)	4 nights × 4,000	16,000.00
Travel: air ticket for Peter Otieno	Typed in	18,000.00
Board vehicle fuel, whole activity	Typed in	8,000.00
Total		**137,200.00**

Part 1: Sign in

EVERY ROLE, THE FIRST TIME

1. Open the test system's address, type your email and password, and press **Sign in**.
2. The first time only, read the NG-CDF Board Data Privacy Statement, tick to agree and accept. Type the six-digit code from your phone if asked.

> **Check.** Each role sees only its own menu. A Head of Department sees no Dashboard, Register, Calendar or Reports. The System Administrator sees settings, users, the staff list and the logs, never activities.

Part 2: Load the staff list and appoint the Head of ICT NEW

SIGN IN AS THE SYSTEM ADMINISTRATOR

1. **Staff list** › **Import HR list**: choose FAPM-Practice-Staff-List.xlsx, press **Check file** (9 would be added), then **Import**.
2. On Samuel Kiprono's row press the **Change position or access** button (the person-in-a-tie icon). Leave the department as ICT. Set **System access** to **Head of Department**, the effective date to today, the reference to **HR/PRAC/01**, and the reason to "Appointed Head of ICT for the practice". Press **Record the change**.
3. A one-time password for samuel.kiprono@example.com appears once. Note it, then press **I have shared it**.
4. Open **Reference data** › **Thresholds**. Leave the Finance and Procurement departments on "(default)". Turn **SMS when action is needed** off if the trainer asks.

Check. Faith (casual) has job grade 10 and Brian (attachee) INTERN. **User accounts** lists Samuel Kiprono as Head of Department, ICT. Open his row's **Change position or access** again: the history shows the change from today to ICT, Head of Department (it was No system access), with the reason, the reference and your name. A Head of Department cannot see this button.

Part 3: Prepare the ICT workplan and budget NEW

SIGN IN AS THE HEAD OF ICT (SAMUEL KIPRONO, WITH THE ONE-TIME PASSWORD)

1. Click **Workplan and budget** and choose this financial year at the top. **Workplan template** downloads the blank template a department fills in.
2. Press **Prepare or import the workplan**. The department is fixed to ICT. Under **Workplan in Excel** choose FAPM-Practice-Workplan-ICT-FY2026-27.xlsx and press **Create draft and import**. (On a draft, **Import from template** adds or updates lines later.)
3. Under **Workplan** press **Edit** beside Objectives for the year and type "Reliable, secure ICT services for every office". Save.
4. Press **Submit to the CEO** and confirm. Sign out.

Check. Four lines, total KES 6,570,000.00. Each shows its objective, deliverables, quarters, quantity × unit cost and responsible officer. The workplan document shows the file you imported. After submitting, the lines are locked, and the Review history shows "Submitted to the CEO, 4 lines, KES 6,570,000.00". The budget does not count yet: the memo form shows no approved allocation.

Test a mistake. In a copy of the file, type Q5 in a Quarters cell and import it into a new draft. Nothing is imported, and the message names the row.

Part 4: The CEO reviews and returns the workplan NEW

SIGN IN AS THE CEO

1. Click **Department budgets**; the badge shows one awaiting you. Open the ICT workplan.
2. On Replace end-of-life laptops press the pen, type 1,900,000 and the reason "Phase the laptops over two years". Save.
3. On ICT policy and standards review press the comment icon and type "Add the deliverables".
4. Press **Return for adjustment** with "Please add the deliverables for the policy review." Sign out.

Check. A **Proposed** column appears: the laptops line shows 3,800,000.00 proposed and 1,900,000.00 in amber. Your comments show under each line and in the Review history. A Head of Department cannot change amounts or approve.

Part 5: The Head of ICT adjusts and resubmits NEW

SIGN IN AS THE HEAD OF ICT

1. The bell and the badge on **Workplan and budget** show it was returned. Open it and read the orange box and the comments on the lines.
2. Edit the policy line: type "Approved ICT policy and standards documents" under Deliverables. Save.
3. Press **Resubmit to the CEO**. Sign out.

> **Check.** The Review history now lists Submitted, Comment, Amount changed, Returned for adjustment and Resubmitted, with the earlier submission kept.

Part 6: The CEO approves the workplan NEW

SIGN IN AS THE CEO

1. Open the ICT workplan and press **Approve budget**, then confirm. Sign out.

> **Check.** The status is Approved and the Budget summary reads proposed 6,570,000.00, approved 4,670,000.00. **Budget position** shows ICT with an allocation of 4,670,000.00. The Head of ICT is told, and can no longer change the lines; changes are made from now on only as adjustments (Part 17).

Part 7: Prepare the activity memo

SIGN IN AS THE HEAD OF ICT

1. **Activity memos** › **Create new activity memo**. Fill it in from the practice memo table. Under Costing choose the budget line **2211300 · Network support visits**; the allocation and the available balance appear beside it. Press **Save draft**.
2. Press **Team and costs** › **Add officers**. Search "Otieno", tick Peter Otieno, choose **Team lead** and press **Add to team**.
3. Press **Add officers** again, choose ICT in the department filter, press **Select all shown**, then untick Mary Njeri and Samuel Kiprono. With the role Member, press **Add to team**.
4. Add two cost lines: Travel for Peter Otieno, air, "Air ticket Nairobi to Kisumu", 18,000.00; and Board vehicle fuel for the whole activity, 8,000.00.

> **Check.** The four DSA lines match the table: 4 nights each (the departure night and 3 activity nights), one rate per scale wherever the activity is, scale 10 (KES 6,300) for the casual and KES 4,000 for the attachee. Change the days to 4 and back to 3 on the memo form: the nights and the total follow. The total is 137,200.00.

Part 8: Preview and submit for review

STILL THE HEAD OF ICT

1. Press **Preview memo**. It follows the Board's memo template: TO, FROM, DATE (the date issued), REF NO (your reference) and SUBJECT; the numbered sections; Annex: A, the Activity Budget Request; and the Participants. The total of 137,200.00 must agree everywhere, and the budget line is named.
2. Press **Submit for review** and choose **Assistant Chief of Staff (for review)**. Tick **I am signing in an acting capacity**: the popup shows your designation becoming "Ag. Manager, ICT". Confirm. Sign out.

> **Check.** The status is Under review and the memo is locked. In the preview, Prepared by reads **Samuel Kiprono** with **Ag. Manager, ICT** underneath; his designation on the staff list is still Manager. Leaving the reference empty (or only spaces) is refused.

Part 9: Review, return and forward

ASSISTANT CHIEF OF STAFF, THEN HEAD OF ICT, THEN THE ASSISTANT AGAIN

1. As the Assistant, open the memo from **Activity memos**, read it with **Memo and annexes**, and press **Return for correction** with "Add the programme of the visit."
2. As the Head of ICT, open it from **Returned for correction**, press **Edit memo**, add the section "Programme of the visit" under More memo sections, save, and press **Resubmit for review**.
3. As the Assistant, press **Forward to CEO**. Sign out.

> **Check.** The status is Awaiting decision. The review comment is kept as written.

Part 10: The CEO approves and instructs the departments that act

SIGN IN AS THE CEO

1. **Decision queue** › **Open** on the memo, then **Approve and authorise**.
2. The popup shows the ICT budget position: allocation 4,670,000.00 and the balance if approved, 4,532,800.00.
3. Tick **Finance: process the imprest** and **Procurement: procure the travel tickets**, with the note "Economy class; imprest to the team lead".
4. Under **Other departments** press **Instruct another department**, choose **Administration** and write "Provide a Board vehicle and driver for the three days". Press **Approve and authorise**.

> **Check.** The status is Approved. On the Decisions & directives tab, under **Instructions to departments**, three instructions show Sent. Leaving the Administration instruction empty stops the approval with a message, so nothing is approved without it. Only the Heads instructed get an alert; Administration's Head (if the trainer created one) sees an instruction sheet with your sentence, the dates, places and team, and no costs. Without a Head, a warning says the instruction waits until one is set up. The memo always reaches you through the Assistant or the Chief of Staff; there is no direct route.

Part 11: Finance processes the imprest

SIGN IN AS THE HEAD OF FINANCIAL SERVICES - ACCOUNTS

1. **Instructions** › open it. Read the sheet: dates, places, team with scales, every cost line and the CEO's note.
2. Press **Acknowledge**, then **Mark as done** with the imprest number **IMP/PRAC/001**.

> **Check.** No memo, justification or budget position is shown. An empty imprest number is refused.

Part 12: Procurement buys the tickets

SIGN IN AS THE HEAD OF SUPPLY CHAIN

1. Open the instruction. Only the air ticket (18,000.00) is listed. Press **Mark as done** with **LPO/PRAC/001**.

> **Check.** No DSA or fuel lines are shown. The CEO and the Head of ICT are told both instructions are done, with their references.

Part 13: Check availability

SIGN IN AS THE HEAD OF ICT

1. Start a second memo starting tomorrow for 1 day, save it, and try to add Peter Otieno to its team. He cannot be ticked: he is on another approved activity that day. Then press **Discard draft**.

Part 14: The team sets off and comes back

CHIEF OF STAFF, THEN ASSISTANT CHIEF OF STAFF

1. As the Chief of Staff, open the activity and press **Confirm commencement**. **In the field today** lists the four officers.
2. As the Assistant, set attendance on the Team tab: Peter, Amina and Faith Attended; Brian Kiptoo Did not attend. Press **Mark completed**, leaving the date empty.

> **Check.** The status is Completed, and the report is due 7 working days after the end date.

Part 15: The Head of ICT reports what was done and spent

SIGN IN AS THE HEAD OF ICT

1. Open the memo and press **Submit activity report**. Type what was achieved, a finding and a recommendation, and attach the PDF.
2. Under **Actually spent on each cost line**, type the planned amount on each line except Brian Kiptoo's DSA, where you type 0. Press **Submit report**.

> **Check.** The ICT budget position now shows 121,200.00 spent (137,200 less Brian's 16,000) and the balance reduced by it.

Part 16: Accept the report and close

CHIEF OF STAFF, THEN HEAD OF ICT, THEN CHIEF OF STAFF

1. As the Chief of Staff, press **Return report** with "Add the number of sites restored."
2. As the Head of ICT, press **Correct and resubmit the report**, add the line, and submit.
3. As the Chief of Staff, press **Accept report**, then **Close**.

> **Check.** The status is Closed, and nothing on the activity can be changed any more.

Part 17: The CEO adjusts the budget mid-year NEW

SIGN IN AS THE CEO

1. Open the ICT workplan and budget and press **Adjust allocation**.
2. Choose **Supplementary allocation (increase)** on Network support visits, amount 160,000, effective today, reason "More offices offline after the rains". Press **Check adjustment**.
3. Read the summary: the line goes from 840,000.00 to 1,000,000.00 and the department from 4,670,000.00 to 4,830,000.00. Press **Apply adjustment**.
4. Open **Reports** › **Budget Adjustments Register**.

> **Check.** The line shows As approved 840,000.00, Increases +160,000.00, Allocation now 1,000,000.00. The Budget summary still says approved 4,670,000.00 and current 4,830,000.00; the approved figure never changes. The register lists the change with the allocation before and after, the reason, the effective date and your name, and a summary row for ICT. Without a reason, Check adjustment is refused. As the Chief of Staff, the button reads Propose adjustment instead, and nothing changes until the CEO approves it.

Part 18 (optional): An officer prepares a memo through a link NEW

HEAD OF ICT, THEN MARY NJERI (NO ACCOUNT), THEN HEAD OF ICT

> This part needs the code email for mary.njeri@example.com to reach a test mailbox the trainer can read. Codes never appear in the Email and SMS log.

1. As the Head of ICT, on **Activity memos** press **Ask an officer to prepare a memo**. Choose Mary Njeri, type "Prepare the memo for the Mombasa office visit", leave 7 days and press **Send the link**. Copy the link shown.
2. In a private browser window (as Mary), open the link, agree to the privacy statement, and press **Send me a code**. Type the code from the email and press **Open the memo**.
3. Fill in the memo with a start date next month, press **Save draft**, add Peter Otieno to the team, add a cost, **Preview the memo**, and press **Submit to the Head of Department**.
4. As the Head of ICT, open it from the **Prepared by officers** tab. Press **Return to the officer** with a comment. As Mary, open the new link in the new email, correct it and submit again.
5. As the Head of ICT, press **Forward to the Chief of Staff**. It continues as in Parts 9 and 10.

> **Check.** Before the code, the page shows no memo. A wrong code is refused, and after five wrong codes a new one is needed. While Mary has the memo, the Head cannot edit or submit it. The memo shows "Prepared by Mary Njeri at the request of Samuel Kiprono". Once Mary submits it, her link says it is no longer available. **Revoke** on the Memo requests list stops a link at once. A declined memo stays on the department's Declined tab, not the CEO's.

Part 19: Look around

Where	What you will see
CEO · Dashboard, Reports	Stage counts, late notice, overdue reports; the Budget Position and Budget Adjustments reports, each exportable with the RESTRICTED marking.
Head of ICT · Workplan and budget	Their own department only, never another's.
System Administrator · Email and SMS log	Every action-needed email and SMS, who it went to (mobiles masked) and whether it was delivered. Codes appear as ******.
System Administrator · Audit and access log	Every view, download and change, including those made by Mary through the link, under her name.

If something goes wrong

What you see	What to do
"Nothing was imported. Fix these rows"	Correct the rows named in the workplan or staff file and import it again; nothing was saved.
No budget line to choose on the memo	The workplan is not approved yet (Part 6).
"is the active Head of ICT"	The department already has a Head. Tick Replace the current Head, or change that Head first.
The memo request link is not available	It expired, was revoked or the memo was submitted. The Head sends a new one.
A button you expected is missing	Your role does not do that step, or the record is at another stage. Check which role the part names.
Something else	Write down the reference, your role, what you pressed and the exact message, and tell your trainer. Do not send screenshots outside the team.

You have finished when

- The ICT workplan is Approved at 4,670,000.00, with a current allocation of 4,830,000.00 after Part 17.
- The practice activity is Closed, with 121,200.00 spent and both instructions Completed.
- Every **Check** box behaved as described. Report any that did not to your trainer, with the part number.
